

For your safety when trekking in the mountains, we recommend that you have a smartphone with a GPS navigation app. This will help us locate you in case of emergencies.

1. Turn on your location setting on your smartphone.

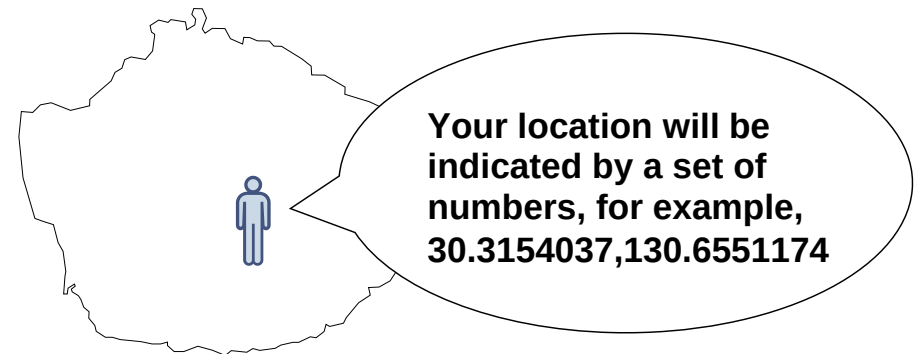

2. Open the GPS navigation app on your smartphone.

***Make sure beforehand the navigation app is installed and allow app to follow your location. This will enable GPS to locate you even when you are not connected to your mobile provider.**

3. A location number will appear. Give this number to the police.

The GPS navigation apps will indicate the latitude and longitude coordinates of your location on your smartphone screen. When you contact the police, please give them these numbers.
